

Some things don't change from one year to the next !

1993

1st

29th April 1993

Robert Kinloch at his practice in Alexandria with Julie Falconer (Project Manager, EDI) Scottish Dental Practice Division.

Robert becomes the 1st Scottish practitioner to electronically transmit live claims from any Scottish practice, via the new DPD Global Crossing facility. Robert was then using the WYSdom dental practice system.

1st

26th October 2009

Robert Kinloch at his practice in Alexandria, with (from right to left) David Tomsett (Head of Programme, Practitioner Services), John Potts (Senior Telecoms Consultant, NHS National Services) and Ralph Walker (Project Manager, Dacoll Ltd).

Robert becomes the 1st Scottish Practitioner to electronically transmit live claims from any Scottish practice, via the new Scottish NHS N3 system. Close examination of both pictures will reveal that Robert has changed just a little since 1993.

Back then Robert used his old WYSdom system whereas today he now uses the UK's leading all graphical charting WYSdom ICONic system. Of course there are some things that simply don't change from one year to the next.

Where WYSdom leads the others will simply follow.

2009
